PROJECT SECOND REVIEW

PROJECT TITLE	An AI-powered Voice Receptionist Framework for Smart Campus Communication and Information Access	
SDG NO & GOAL MAPPED	SDG 04 - Quality Education SDG 09 – Industry, Innovation and Infrastructure SDG 16 – Peace, Justice and Strong Institutions	
TEAM-ID	T075	
SUPERVISOR NAME	Mr. B. Bhuvaneswaran, Assistant Professor (SG)	
DATE:	**TEAM MEMBER – 1, 2**	**TEAM MEMBER – 3, 4**
ROLL NO	230701019, 230701138	230701347, 230701502
STUDENT NAME	Akash N, Kamalesh S P	Subramani A, Guru Raja T

Type of Project - Select the Option	**Research Project / Industry Project / Internal / Product Based Project**
TRL (Put tick mark)	**BP | TC | POC | PL | PE | EN** **(BP – Basic Principle | TC – Technology Concept | POC – Proof of Concept | PL – Prototype (Lab) | PE – Prototype (Environment) | EN – Entrepreneurshi**p)
Outcome of the Project	Development and implementation of an end-to-end voice-based AI receptionist prototype capable of handling routine college telephone inquiries using Asterisk telephony, speech recognition, Retrieval-Augmented Generation (RAG), a locally hosted Large Language Model, and text-to-speech synthesis. The system retrieves institution-specific information from a locally constructed knowledge base and provides context-grounded voice responses through real-time telephone interaction.
Publication (Conference / Journal Identified)	**Date of Conference :** 15th December 2026 - 17th December 2026 **Conference title:** IEEE ICSCDS 2026 **Hosting Institution:** Shree Venkateshwara Hi-tech Engineering College, Erode - 638455, Tamil Nadu, India.

#	Measure	Poor (0–3)	Good (4–6)	Excellent (7–9)
M1	**Objectives & Methodology**	Objectives not identified or poorly defined; specification incomplete or unclear.	Objectives stated but justification incomplete; steps mentioned but not clearly tied to objectives.	Objectives clearly and completely defined; steps to achieve them clearly specified and justified.
M2	**Design**	Problem divided into modules, but framework/tool selection inappropriate; design methodology not defined.	Appropriate framework/tool selection; design methodology present but not well justified.	Appropriate framework/tool selection; design methodology appropriate and clearly justified.
M3	**Concepts & Technical Detail**	Explanation of key concepts incomplete or has little grounding in literature; technical requirements insufficiently described.	Key concepts clearly explained and grounded in literature, but technical requirements only partially described.	Key concepts clearly explained and well grounded in literature; technical requirements thoroughly and precisely described.
M4	**Presentation**	Content not well organized or relevant; delivery unclear, little audience engagement.	Content mostly appropriate but not fully polished; delivery understandable but engagement inconsistent.	Content appropriate, well organized, and well delivered; strong audience engagement, clear voice and language.
M5	**Project Report**	Report does not follow specified format; references/citations missing or inappropriate.	Report follows specified format; references/citations appropriate but inconsistently/incompletely cited.	Report follows specified format; references/citations appropriate, complete, and correctly formatted.
M6	**System Functionality & Integration**	Little to no integration between modules; most of the system doesn't run yet.	Majority of modules integrated and demonstrable; some gaps/manual workarounds remain, with a clear plan to close them before Third Review.	System runs end-to-end with only minor gaps; demo matches what's reported; path to full completion is clear.
M7	**Code, Testing & Version Control**	Code disorganized/hard to follow; no evidence of testing or version control; student cannot explain how correctness was checked.	Code reasonably structured and modular; some manual testing evidence and basic version control (commit history); coverage/discipline limited.	Code clearly structured and modular; visible testing evidence and active version control practice; student clearly explains what's tested and what isn't.
M8	**Viva / Defence**	Unable to answer panel's questions about own work; responses vague, rehearsed, or inconsistent with what was presented.	Answers most questions correctly but with hesitation; explains "what" was done but struggles with "why".	Answers confidently and accurately, including "why" questions; justifies design choices, discusses alternatives, acknowledges limitations honestly.
M9	**Innovation / Problem-Solving**	Direct, unexamined copy of an existing solution with no adaptation to the specific problem context.	Reasonable, standard solution correctly applied; limited originality but technically sound.	Original thinking — a novel angle, thoughtful adaptation, or creative combination of techniques suited to the problem.
M10	**Real-World Readiness (Security / Scale / Error Handling)**	No consideration of security, error handling, or scalability; brittle, demo-only build.	Some awareness of security/error handling/scalability, partially handled.	Thoughtful handling of edge cases and basic security; realistic awareness of what it would take to scale or deploy this.
---	**Paper Publication**	No target journal/conference identified; no progress toward drafting. (0–3)	Target Scopus-indexed journal/conference identified and Supervisor-approved; drafting underway, not yet submitted. (4–6)	Paper submitted for review, or fully drafted and ready with a clear, Supervisor-approved submission timeline. (7–10)

M1 Objectives & Methodology (0–9)	M2 Design (0–9)	M3 Concepts & Technical Detail (0–9)	M4 Presentation (0–9)	M5 Project Report (0–9)	M6 System Functionality & Integration (0–9)	M7 Code, Testing & Version Control (0–9)	M8 Viva / Defence (0–9)	M9 Innovation / Problem-Solving (0–9)	M10 Real-World Readiness (Security/ Scale/Error) (0–9)	Paper Publication (0–10)	TOTAL (out of 100)
